

February 2020

Dear Parent/Guardian

## Year 9 Option Choices

We are approaching the time when decisions have to be made about the GCSE courses your child will follow in years 10 and 11.

As you will likely know, GCSE examinations are now graded from 1 – 9, with level 9 being the highest. For context, a level 4 grade represents a standard pass, a level 5 represents a good pass, and a level 9 grade represents an even higher level of achievement than an old A\* grade. Many GCSE subjects are now assessed exclusively by examinations at the end of Year 11, and this change represents a new challenge for students in terms of discipline and organisation.

In order to help our students meet the demands of these qualifications, most will study nine GCSEs from September 2020, although some will study more if they follow the triple science course and/or take the further mathematics GCSE. Nine good GCSEs will prepare students fully for studying the International Baccalaureate in the Sixth Form and are more than sufficient for entry to all university courses, apprenticeships or careers.

It is important that option decisions are based on good information and advice. Students have had an options assembly which has started the process, and the following programme will further help parents and students with their choices:

### Thursday 12 March:

There will be a parents' consultation evening when you will have the opportunity to discuss your child's progress and potential options with his/her subject teachers. Senior members of staff will be available for further advice.

### Monday 16 – Friday 27 March:

All students will be interviewed and advised by a member of staff about their choices. Parents are welcome to attend if they wish. Students will receive a letter stating the date and time of their interview; please do check this date and time with your child. **For our records, students must bring their signed option form to interview. This form can be found at the end of this booklet.**

We trust that these arrangements will enable you and your child to make decisions based on clear information and informed advice. For your convenience, this option booklet, along with the presentation given to the year 9 students during the options assembly, will be available on the school website from Friday 14 February.

Yours faithfully

Mr B Forward  
Assistant Headteacher

## Dane Court Grammar School – Options 2020

### Heads of Department for the Key Stage Four Curriculum

Art and Design	Mr D Brooks
Business Studies	Miss C Diffley
Computing	Mr S Lycett

Music	Mrs A Fox
Philosophy	Mr G Richardson
Physical Education	Miss G Bolt
Sciences:     Biology	Mr J Butt
Chemistry	Mr M Green
Physics	Mr L Fricker

## Dane Court Grammar School – Options 2020

### Introduction

This folder has been prepared for year 9 students at Dane Court Grammar School and their parents as a practical guide to the subjects that may be studied for the General Certificate of Secondary Education (GCSE).

In their first three years at the school, students have followed a very broad course, designed to give them access to as wide an educational experience as possible. As they move into the two years that see them prepare for GCSE examinations, students have the opportunity to specialise by choosing courses that reflect individual strengths. The curriculum in years 10 and 11 has been planned so that all students follow a sound educational programme. This is balanced, offers an appropriate breadth of study for an intelligent citizen of the future, and ensures that, by a sensible selection of GCSE subjects, students can follow a programme tailored to their interests. In our sixth form they will keep their career options open by studying the International Baccalaureate Diploma Programme or the International Baccalaureate Career-related Programme.

### The Key Stage 4 Curriculum

Having completed Key Stage 3 at the end of year 9, students will move into Key Stage 4. The curriculum ensures that they follow a course that is broad and balanced. The following compulsory courses form the core of the curriculum:

- English
- Mathematics
- Science
- A Modern Language
- Independent Cultural Enrichment (ICE)
- Physical Education

Students also choose two other subjects of their choice from a range of options.

Our students are academically able and thus quite capable of coping with nine or ten GCSE courses.

## Dane Court Grammar School – Options 2020

### The Examined Curriculum

All students will study the following combination of courses for GCSE:-

1. English Literature and Language for all. (Two GCSEs).
2. Mathematics Two GCSEs (One Mathematics and one Statistics).
3. Science Two GCSEs – GCSE Combined Science (Trilogy)  
or Three GCSEs – GCSE Biology, GCSE Chemistry, GCSE Physics.
4. A modern language All students study at least one modern language (French or German).
5. Two additional subjects Students will study two subjects from the following list: Art; Business; Computing; Drama; Food Preparation and Nutrition; Geography; History; a second Modern Language; Music; PE; Philosophy. Please be aware that a subject will only run if a minimum of fifteen students opt to do it. For this reason we require students to choose three subjects from this list, one of which will be a reserve choice.

### GCSE Courses

Heads of departments at Dane Court have selected a curriculum which they believe to be the most appropriate for the needs of our students. In this pack, you will find a brief overview of each subject, which includes information about subject content and course requirements. GCSE courses will be examined at the end of the two-year course, rather than at the end of modules.

As well as examinations at the end of year 11, non-examined assessments are also carried out in some subjects over the two-year GCSE course. Marks from these non-examined assessments count towards the final GCSE grade so it is important that students maintain high levels of effort, achievement and attendance throughout years 10 and 11.

### Advice

Students and parents will want to discuss options choices in depth. The information contained in this folder will, we hope, guide your choice. The following staff at school can also help you:

- i Your subject teachers can advise you about your prospects in a particular subject.
- ii Your form mentor and head of house can give you some advice of a general nature.
- iii Any member of the senior leadership team can give you specialist advice.

The decision you make about your choices for next year is very important. It will dictate the course of your education for at least the next two years and may influence your whole career. Please do not be afraid to ask for advice.

## Dane Court Grammar School – Options 2020

### How Do I Choose?

In making your choices you should bear in mind the following points.

- i. The subjects that you are good at.
- ii. The subjects that you like.
- iii. The subjects that may be necessary for any future career you have in mind.
- iv. Maintaining a balance so that you keep career options open.

### When Do I Choose?

On **Thursday 12 March** the normal year 9 parents' consultation meeting will be held, at which your parents will have the opportunity to discuss with your teachers the progress you are making in your different subjects. Senior members of staff will also be there for further advice.

In the two weeks from **Monday 16 March** all students will be interviewed by a member of staff. Parents are welcome to attend in order to ensure that the most appropriate choices are being made.

On the basis of the information that you give us, the school will attempt to construct a timetable that will allow each of you to study the subjects that you wish. It has to be pointed out at this stage that sometimes we are not able to accommodate the choices of every student and have to ask one or two students to choose again. Whilst we do our best to meet the requirements of every individual, you will understand that we have to construct your timetable in order to satisfy the needs of the majority.

After the summer examinations there may be an opportunity for you to change your choice of subjects if you wish to. It is important to note, however, that changing your mind at that stage may not be entirely straightforward as some courses will already be full, and some combinations of courses may not be possible.

### Course Information

In order to help you with your choice you will find, on the following pages, brief descriptions of all the courses that you might follow next year.

## Dane Court Grammar School – Options 2020

### Independent Cultural Enrichment

The 'ICE' course will offer a broad-based two-year enrichment course, designed to encourage and challenge students to think about issues of vital importance in 21st century Britain. Students will engage with issues of identity, gender, diversity, sex and relationships, and the cultural contexts in which they are expressed, including issues of pluralism, 'Britishness', multiculturalism (confronting stereotypes), race and religion, beliefs and values; careers-related aspects of education will also be taught in this course. This course will make an important contribution to the spiritual, moral, social and cultural (SMSC) education of students in key stage 4, and will help to confront narrow and mono-cultural ideologies. Methodologies will include discussion, debate, visiting speakers and investigation of topical issues, alongside taught elements.

It is intended that the knowledge and skills acquired throughout this course will both support students' learning in other subjects as well as prepare them for life in the 21st century.

### Physical Education

Physical education is a compulsory element of the curriculum from years 7 - 11. During key stage 4 students continue to develop some of the sports covered in key stage 3, as well as experiencing some new activities. Lifelong leisure pursuits, leading to a healthy lifestyle, are included in the programme.

Students will spend time improving their own performance; learning to analyse their own and others' performance; coaching; expanding their knowledge of rules; officiating.

Students are expected to attend lessons wearing the correct kit. High standards of dress are maintained over the next two years. Football boots are essential for boys. Apart from football boots, all replacement items of clothing are available for purchase from the PE department at any time. Students have the option to pursue the Level One Sports Leadership Award during their core PE lesson.

### Careers

Careers education at Dane Court aims to equip each student with the knowledge and skills necessary to plan and follow a chosen career plan. It should perhaps be thought of less as a subject and more as a process. This process, which aims to raise the expectations and aspirations of all students, begins in year 7 and continues into key stage 4 and 5. Each year, students engage with units of study that build a comprehensive programme in which students have access to employers and advice from experts from a variety of careers. In years 10 and 11, there are further activities concentrating upon the development of the individual as well as an introduction to work related learning via the Business of Enterprise Project and a comprehensive programme of careers education allowing students to understand the choices they are to make. During the Business of Enterprise Project each student works together in a group to create a virtual company, testing their team working skills and ability to work to deadlines. During the year 11 programme, emphasis moves to research and choices regarding IB and other post-16 courses. Additional topics are the changing nature of careers in the new century, issues concerning equality in the workplace, applying for jobs and CV writing and instruction on the on-line application system for further education. Individual and independent careers advice is offered via interview to all year 11 and 9 students to help deliver them at the end of key stage 5 with a firm career plan.

The students from all year groups will have the opportunity of attending a global village event which allows them to meet with a variety of career professionals and engage with a variety of career related and higher education workshops.

## Dane Court Grammar School – Options 2020

### Art and Design

**Exam Board: EDEXCEL**

**Specification Code: 1FA0 and ITDO**

**Exam Weighting: 40%**

**Weighting for Non-examined Assessment: 60%**

GCSE Art and Design is about having an adventurous and enquiring approach to learning where you will develop the skills and confidence to express your own ideas.

Studying art and design is not only about becoming an artist. Being creative is essential for many careers. Imaginative, innovative, intuitive people are highly sought after in business, media, engineering, science, teaching and many other careers.

As a Dane Court GCSE Art and Design student you will become a more independent individual: you will be able to take risks, make mistakes and learn from them. You will learn to communicate effectively in writing, verbally and visually. You will be able to manage and deliver long term projects.

At Dane Court we offer a multidisciplinary course with two distinct pathways and many possible areas of exploration. Our two paths are GCSE Art and Design: Fine Art or GCSE Art and Design: Three dimensional design.

The course we deliver is based on an art and design college foundation model where students who opt for either of the art and design courses will rotate on a two week carousel, learning skills and processes, working with a range of materials and exploring drawing systems for different functions. In the autumn term students will complete short projects in ceramics, fabric and textiles, oil painting, photography, plaster sculpting and resistant materials. At the end of these introductory lessons students will specialise in either fine art or a three dimensional discipline and will be allotted an art and design tutor who will lead them through the development and completion of their own art and design pieces. Students will build up lively sketchbooks full of ideas, material investigations and visual resources through which they will prepare for making a series of studio art or design pieces.

The Art and Design GCSE is assessed as two units of work.

1) A personal portfolio of art and design work in the form of sketchbooks, studio and workshop made pieces. The personal portfolio contains all of the work produced from September of year 10 to the December of year 11. The personal portfolio is worth 60% of the GCSE.

2) An externally set assignment is a 10 week project (running from January to May of year 11) in which students explore a set theme, question or brief and produce a body of preparatory and completed art and design pieces which culminates in a 10 hour controlled assessment. The externally set assignment is worth the remaining 40% of the GCSE.

If you are interested in art, craft or design and enjoy drawing or making things; if you have an aptitude or, more importantly, the attitude for being creative, independent of spirit and motivated to produce exciting, thoughtful and beautiful things, we will help you to realise your potential.

## Dane Court Grammar School – Options 2020

### Business

**Exam Board: Edexcel**      **Specification Code: 1BS0 Exam weighting: 100%**

The Business and Finance Department equip students with Business Acumen that students can effectively apply in real world settings, whether as an entrepreneur or a proactively contributing employee, to improve their success and growth.

The Business GCSE is an exciting course written in response to feedback from the business subject community, including business owners and managers, teachers, professional bodies and higher education. It is delivered by teachers with several years of business experience, to give engaging and inspiring lessons that reflect modern and evolving business. You will develop key knowledge and skills through discussion, research and investigation and practical tasks, alongside exam preparation. This qualification enables students to develop as commercially minded and enterprising individuals and provides learning that is highly relevant to most career pathways. The course is structured in two themes.

**Theme 1: Investigating small business** - through the lens of an entrepreneur, students will be introduced to local and national business contexts, behaviours and decisions.

1. **Enterprise and entrepreneurship** – what makes a good business idea, the risks and rewards of business and the role of entrepreneurs.
2. **Spotting a business opportunity** – how new and small businesses identify opportunities through understanding customer needs, market research and competitor analysis.
3. **Putting a business idea into practice** – making a business idea happen through identifying aims and objectives and concentrating on the financial aspects.
4. **Making the business effective** – students will explore a range of factors that impact on the success of the business, including location, the marketing mix and the business plan.
5. **Understanding external influences on business** – responding to changes and development in technology, legal, politics and the economic climate.

**Theme 2: Building a business** covers how to run an effective business and how businesses grow and develop into productive and popular, international brands.

1. **Growing the business** – methods of growth, how businesses evolve and the impact of globalisation and the ethical and environmental consideration.
2. **Making marketing decisions** – applying the marketing mix, covering promotion and advertising, product design, pricing and distribution choices.
3. **Making operational decisions** – this topic focuses on meeting customer needs through the design, supply, quality and sales decisions a business makes.
4. **Making financial decisions** – students will explore the tools a business has to support financial decision making, including ratio analysis, profit margins and basic accounting.
5. **Making human resource decisions** – how to recruit, train, organise and motivate staff.

Theme 1 is completed in year 10 and Theme 2 by February half term in year 11. This gives a substantial opportunities for revision. The course is examined through two written papers in the summer of year 11. There is no coursework.

**In 2019, 48% of students studying Business GCSE achieved a grade of 7-9. This represented an added value improvement of +1.34.**

## Dane Court Grammar School – Options 2020

# Computing

**Exam Board:** OCR

**Specification code:** J276

**Exam weighting:** 100%

### Introduction

In a recent skills survey over 70% of the people questioned said that using a computer was essential to their job. This number has increased by 20% in the last 10 years (more than double the rise of any other skill).

Recent speeches from Google, Microsoft and other leading technology companies have stressed the need for all students to have an understanding of computing, especially with the drive towards a new UK job market based around high level computing skills such as programming and special effects.

The computing (9-1) GCSE offered at Dane Court is new and designed to meet these challenges. It is a course that expands on the knowledge students have gained over the years, providing the perfect foundation for students who are looking for a career with a computing element.

The course itself is split into two different sections; programming and computing theory - both are assessed by external examination at the end of the course

### Exam one - Computer systems

Students learn about the theory of a computer, looking at questions such as what different parts are used to make a computer and how they link together. They explore topics on the theory behind the hardware and how computers use data to store information.

This section is worth 50% of the final GCSE and involves a 1 hour 30 minute examination.

### Exam two - Computational thinking, algorithms and programming

Students learn critical computational thinking and problem solving skills which in turn gives them the tools to understand computer programming. Students are challenged with coding problems that they have to solve and must be able to write programs spontaneously.

This section is worth 50% of the final GCSE and involves a 1 hour 30 minute examination.

## Dane Court Grammar School – Options 2020

### Drama

**Exam Board: WJEC/EDUQAS**

**Specification Code: C690QS**

**Weighting for Non-examined Assessment: 40%**

**Practical Exam Weighting: 20%**

**Written Exam Weighting: 40%**

In many areas of life today Drama is recognised as a valid and useful method of learning. In business, industry, social services and education, role-playing is often used as a method of understanding problems and finding solutions. Within the framework of a secure and trusting situation, participants in Drama can often find out more about themselves and others than can be discovered from reading a text book.

The GCSE course is not about training for a career on the stage. Besides the aims stated above, its purpose is to foster an interest in drama and theatre.

The course consists of three units.

#### **Component 1: Devising Theatre – 40% of GCSE**

Non-examined assessment: internally assessed, externally moderated.

Learners will be assessed on **either** acting **or** design.

Learners participate in the creation, development and performance of a piece of devised theatre using **either** the techniques of an influential theatre practitioner **or** a genre, in response to a stimulus set by WJEC.

Learners must produce:

- a realisation of their piece of devised theatre
- a portfolio of supporting evidence
- an evaluation of the final performance or design.

#### **Component 2: Performing from a Text – 20% of GCSE**

Practical exam: externally assessed by a visiting examiner.

Learners will be assessed on **either** acting **or** design.

Learners study **two** extracts from the **same** performance text chosen by the centre.

Learners participate in **one** performance using sections of text from **both** extracts.

#### **Component 3: Interpreting Theatre – 40% of GCSE**

Written examination: 1 hour 30 minutes.

##### **Section A: Set Text**

A series of questions on **one** set text from a choice of five.

##### **Section B: Live Theatre Review**

**One** question, from a choice of two, requiring analysis and evaluation of a given aspect of a live theatre production seen during the course.

## Dane Court Grammar School – Options 2020

### GCSE English Language

**Exam Board: AQA**                      **Specification Code: 8700**

**Exam Weighting: 100%**

#### **Aims:**

Throughout the two year course, students will develop skills in speaking, listening, reading and writing, necessary to communicate with others confidently, effectively, precisely and appropriately. We aim to foster students' ability to express themselves creatively and imaginatively, selecting and adapting their speech and writing to different situations and audiences. They will become critical readers of a range of texts, using reading to develop their own skills as writers.

#### **Paper 1**

Section A Reading	Section B Writing
One literature fiction text followed by a series of questions worth a total of 40 marks (25% of GCSE) <ul style="list-style-type: none"> <li>• One short form question (1 x 4 marks)</li> <li>• Two longer form questions (2 x 8 marks)</li> <li>• One extended question (1 x 20 marks)</li> </ul>	Descriptive or narrative writing worth a total of 40 marks (25% of GCSE) <ul style="list-style-type: none"> <li>• One extended writing question from a choice of two (24 marks for content, 16 marks for technical accuracy)</li> </ul>
<b>Assessed by</b> written exam: 1 hour 45 minutes 80 marks 50% of GCSE	

#### **Paper 2**

Section A Reading	Section B Writing
One non-fiction text and one literary non-fiction text followed by a series of questions worth a total of 40 marks (25% of GCSE). Texts are linked by theme; one is taken from the 19 <sup>th</sup> century. <ul style="list-style-type: none"> <li>• one short form question (1 x 4 marks)</li> <li>• two longer form questions (1 x 8, 1 x 12 marks)</li> <li>• one extended question (1 x 16 marks)</li> </ul>	Writing to present a viewpoint worth a total of 40 marks (25% of GCSE) <ul style="list-style-type: none"> <li>• one extended writing question (24 marks for content, 16 for technical accuracy)</li> </ul>
<b>Assessed by</b> written exam: 1 hour 45 minutes 80 marks 50% of GCSE	

## Dane Court Grammar School – Options 2020

### GCSE English Literature

**Exam Board: AQA**      **Specification Code: 8702**

**Exam Weighting: 100%**

#### **Aims:**

Throughout the two year course, students will engage with many texts from the English Literary Heritage that have been influential and significant over time and explore their meaning today. They will explore how texts from different eras may reflect or influence values, assumptions and sense of identity. Students will be encouraged to connect ideas, themes and issues, drawing on a range of perspectives, thereby becoming sensitive and critical readers of fiction prose, poetry and drama.

#### **Paper 1**

Section A Shakespeare	Section B Nineteenth Century Novel
Students will answer one question on the play studied in class. They will be required to write in detail about an extract from the play and then to write about the play as a whole.	Students will answer one question on the novel studied in class. They will be required to write in detail about an extract from the novel and then to write about the novel as a whole.
Assessed by written exam: 1 hour 45 minutes 64 marks 40% of GCSE	

#### **Paper 2**

Section A Modern Texts	Section B Poetry Anthology	Section C Unseen Poetry
Students will answer one essay question from a choice of two on their studied modern prose or drama text.	Students will answer one comparative question on one named poem printed on the paper and one other poem from their chosen anthology cluster.	Students will answer one question on one unseen poem and one question comparing this poem with a second unseen poem.
Assessed by written exam: 2 hours 15 minutes 96 marks 60% of GCSE		

## Dane Court Grammar School – Options 2020

# GCSE Food Preparation and Nutrition

**Exam Board: AQA**

**Specification Code: 8585**

**Written Examination 50%**

**Two Non-examined Assessments 50%**

GCSE Food Preparation and Nutrition will build students' practical skills and increase their knowledge and understanding of food science, nutrition and healthy eating. This qualification is an excellent foundation for further study of food in the sixth form IB programme where it is taught as one of the Group 4 sciences. Food Preparation and Nutrition will encourage students to make informed decisions about food and nutrition in order to feed themselves and others affordably and healthily. It enables students to understand the huge challenges that are faced globally to supply the world with nutritious and safe food.

Fifty per cent of the course is non examined assessment (NEA). This comprises two tasks which are summarised below:

**Non-examined Assessment: Task 1: Food investigation** – An investigative assessment worth 15% (ten hours). You will produce a 1500-2000 word report including photographic evidence of a practical investigation, showing your understanding of the working characteristics, functional and chemical properties of ingredients.

**Non-examined Assessment: Task 2: Food preparation assessment** – A food preparation assessment worth 35% (twelve hours). You will prepare, cook and present a final menu of three dishes within three hours, planning in advance how this will be achieved. There is a choice from three possible scenarios such as the cuisine from another country or a specific dietary need, for example vegetarianism. It is expected that students will cook every week in order to develop their practical skills and to produce a wide range of high quality dishes.

### Areas of Content

- 1. Food commodities, nutrition and health:** Students will work with a varied range of commodities, learn about the nutrients, their sources, function and deficiency diseases and will discover how to make informed choices for a varied and balanced diet.
- 2. The science of food:** Students learn about heat transfer and selection of appropriate cooking methods, the functional and chemical properties of food and raising agents.
- 3. Food safety:** Students learn to recognise and prevent food spoilage and contamination. They study microorganisms and enzymes and the principles of food safety including buying and storing food.
- 4. Food choice:** The course looks at cultural, medical, ethical and religious influences on food choice, British and International cuisine, sensory evaluation and food labelling and marketing.
- 5. Food provenance:** Students are made aware of environmental impact and sustainability of food, where and how ingredients are grown, reared and caught and food processing and production.
- 6. Food preparation and cooking techniques:** Twelve practical skill groups integrated throughout the course.

The course is useful for many different career routes such as medicine, nursing, dietetics, nutrition, food science, food technology or new product development. To be able to cook and to have a good knowledge of food sourcing and food choice is a useful skill for anyone. This subject links well with Art and Design, Business Studies, Sport and many other subjects in the curriculum.

The course will be interesting, useful, academically challenging but fun. Students will enjoy having the opportunity to take part in practical activity each week and will become involved in large scale projects such as the Year Six Open Day and cooking their own Christmas dinner. We will endeavour to organise trips, special events and speakers and will arrange for students to take the nationally recognised Level Two Certificate in Food Safety and Hygiene.

## Dane Court Grammar School – Options 2020

# Geography

**Exam Board: OCR**

**Specification Code: J384 (Geography B)**

**Exam Weighting: 100%**

The ‘**Geography for Enquiring Minds**’ new syllabus will enable learners to build on their MYP/key stage 3 knowledge and skills to:

- Develop and extend their knowledge of locations, places, environments and processes, and of different scales including global; and of social, political and cultural contexts
- Gain understanding of the interactions between people and environments, change in places and processes over space and time, and the inter-relationship between geographical phenomena at different scales and in different contexts
- Develop and extend their competence in a range of skills including those used in fieldwork. Human and physical geography fieldwork will be undertaken in the local area during the course.

**Key areas of study are:**

- **Our Natural World (01)** – learners will gain an appreciation of the natural world around them including tectonic and weather hazards, climate change, the UK’s distinctive landscapes and the global ecosystems which support life on the planet.
- **People and Society (02)** – Learners will explore the complexities of People and Society through studying why more than half of the world’s population live in urban areas, the dynamic nature of development, the UK in the 21st century and human reliance on key resources for survival and economic gain.
- **Geographical Exploration (03)** – The links, connections and ideas within the eight topics of Our Natural World (01) and People and Society (02) will be brought together for a Geographical Exploration (03). Application of knowledge, understanding and skills will be important in learners questioning and developing arguments, and a decision making exercise will allow learners to become critical thinkers.

Content Overview	Assessment Overview	
Global Hazards Changing Climate Distinctive Landscapes Sustaining Ecosystems Fieldwork Geographical Skills	<b>Our Natural World (01)</b> 70 Marks 1 hour 15 minutes written paper	<b>35%</b> of total GCSE
Urban Futures Dynamic Development UK in the 21st Century Resource Reliance Fieldwork Geographical Skills	<b>People and Society (02)</b> 70 Marks 1 hour 15 minutes written paper	<b>35%</b> of total GCSE
Geographical Skills Decision Making Exercise	<b>Geographical Exploration (03)*</b> 60 Marks 1 hour 30 minutes written paper	<b>30%</b> of total GCSE

The GCSE is an excellent foundation and stepping stone for further study of Geography in the IB Diploma Programme and the IB Career-related Programme.

## Dane Court Grammar School – Options 2020

### History

**Exam Board: AQA Specification Code: 8145**

**Exam Weighting: Two exam papers of 2 hours each making up 50% of the GCSE.**

An exciting course has been selected for those taking GCSE History. Students will take two papers. The first is entitled ‘Understanding the modern world’. In this students will study Germany 1890-1945 (including Hitler) and conflict and tension in Asia 1950-75 (including the Vietnam War). Paper 2 is called ‘Shaping the Nation’ and has two parts: firstly ‘Migration, Empires and the People c790 to the present day’ which starts with the Viking invasions and ends up in the twentieth century; secondly, there is a depth study on Elizabethan England.

**Germany 1890-1945** covers the difficulties faced by the German Kaiser (Emperor) at the end of the nineteenth century, the impact of the First World War, the problems that Germany had in the 1920s, Hitler’s rise to power and his rule of Nazi Germany up to the end of World War Two.

**Conflict and Tension in Asia 1950-75** covers some of the Cold War and focuses on both the Korean War and the Vietnam War. The causes, events and end of both wars are looked at, including the growing protest movements towards the Vietnam War in the USA.

**Migration, Empires and the People c750 to the present day** is a thematic study which will help students understand how Britain has been shaped by the wider world. It starts off with the Viking invasions and England’s relationship with France (including the Normans and the Hundred Years’ War). It then moves on to the start of the British Empire including the development of the slave trade and the colonisation of North America, expansion into India (the role of Robert Clive) and Africa (including the second Boer War). Finally it looks at the end of Britain’s empire (including the role of Gandhi and also the Suez Crisis), the aftermath of empire, such as migration from Asia and Africa, the Falklands War and Britain’s relationship with the European Union including European and non-European migration.

**Elizabethan England 1568-1603** looks at the last 35 years of Elizabeth I’s reign: her character and court, life in Elizabethan times, rebellions and plots, Mary Queen of Scots, Drake’s circumnavigation of the world and the Spanish Armada. It also has a major focus on a site study which is chosen by the exam board each year. This will look at the site and its relationship with historical events and developments as well as giving understanding of how people lived at the time, their beliefs and values.

Students may benefit from the chance to attend a GCSE conference. The study of History should be both enjoyable and informative. Whilst the skills it teaches have often been seen as particularly appropriate for Law, Education and Management, the training it gives means that it is valued as a subject by most employers. History teaches students to think, analyse and present information clearly, as well as informing them about the world they live in. As the Historical Association says, “History can give the skills most employers want, whatever the job you have in mind”.

## Dane Court Grammar School – Options 2020

### Mathematics and Statistics

**Exam Board: EDEXCEL**

**Statistics Specification Code: 1STO      Exam Weighting: 100%**

**Mathematics Specification Code: 1MA1      Exam Weighting: 100%**

The study of mathematics is an essential part of secondary education.

It is the aim of the department to develop a positive attitude to mathematics, including confidence, enjoyment and perseverance such that students have the ability to use their skills in other areas of the curriculum and as a firm foundation for appropriate further study. This will include a willingness to work independently and cooperatively as well as the ability to communicate mathematical ideas in a variety of ways.

All students will follow a pathway over the two years that will lead to two GCSEs in maths related subjects. At the end of year 10 it is anticipated that all students will be ready to sit the Higher Level Statistics GCSE and then, at the end of year 11, they will progress towards Edexcel GCSE (9 – 1) in Mathematics.

It is our intention to enter all students for the Higher Tier (leading to GCSE grades 9 – 4) in both papers. After consultation with parents it may become necessary for a small number to enter at the Foundation Tier (leading to GCSE grades 5 – 1).

The new Mathematics GCSE will demand deeper and broader mathematical understanding than in previous years. It will provide all students with greater coverage of key areas such as ratio, proportion and rates of change and require them to apply their knowledge and reasoning to provide clear mathematical arguments. It will focus on ensuring that every student masters the fundamental mathematics that is required for further education and future careers. It will provide greater challenge for the most able students by thoroughly testing their understanding of the mathematical knowledge needed for higher level study and careers in mathematics, the sciences and computing.

The new Statistics GCSE gives our students a chance to learn key application skills that not only will be needed and in fact be crucial with any IB qualification, but also to develop many analytical skills that are currently needed in so many employment situations. There is now no coursework element to this qualification and these types of skills have been embedded into the examination papers.

A number of students may also be given the opportunity to sit an AQA qualification in further mathematics in Year 11 if we feel it would be advantageous to the next level of their education.

All students will need their own electronic calculator so that the key operations are learnt and embedded before any external examination is undertaken.

## Dane Court Grammar School – Options 2020

### Modern Languages

**Exam Board: AQA**

**Specification Code: French 8658, German 8668**

**Exam weighting: 100%**

#### **What will I learn?**

During the GCSE course, you will learn to communicate effectively in everyday situations you would be likely to encounter when visiting or having contact with a foreign country. You will learn to express not only factual information, but also your opinions and justification of them, in both the spoken and written language. You will also be well prepared to continue the study of the language at IB level. The core content of the AQA specification is divided into 3 themes:

*Theme 1: Identity and culture*

*Theme 2: Local, national, international and global areas of interest*

*Theme 3: Current and future study and employment*

#### **What skills will I develop?**

You will develop an awareness of the nature of language and language learning and will be taught the necessary skills and grammatical structures to enable you to express yourself fluently. You will develop and utilise your ICT skills, both inside and outside the classroom, and you will achieve a suitable foundation for further language study and/or practical use of the target language.

#### **How will I be assessed?**

You will be prepared for the AQA GCSE examination in your chosen language. The aim of the course will be to develop listening, speaking, reading and writing skills in preparation for the final assessments in May or June of year 11 with each skill weighted 25%. The listening paper consists of questions and answers in both English and the target language; in addition, the reading paper includes a translation question into English. The speaking examination includes a role-play, a description of a photo-card and a general conversation. For the writing paper you must complete a structured writing task, an open-ended task and a translation into the target language.

#### **Facilities**

A range of standard office and specialist software to support lesson delivery is used, for example, Boardworks and TaskMagic. We also use and subscribe to various specialist websites such as Languagesonline and Linguascope. The AQA Exampro service is used for examination practice. All language classrooms are fitted with interactive whiteboards and two classrooms are equipped with laptops where students are encouraged to work independently. The Languages department also has its own class set of chromebooks.

#### **Broadening the horizon – beyond the curriculum**

There are numerous residential opportunities for GCSE language students including a trip to Le Château de Warsy in northern France and there plans for a German residential. In addition, the department has links with Kent University and, each year, year 10 students have the opportunity to attend a conference in March to learn about studying languages at university.

## Dane Court Grammar School – Options 2020

### Music

**Exam Board: Edexcel**

**Specification Code: 1MUO**

**Exam Weighting:**

**40%**

**Weighting for Non-examined Assessment:**

**60% (Performance 30% and 30% composition)**

Music is constantly evolving, inspiring creativity and expression. This course will motivate and stretch students of all abilities and appreciates all styles and genres, catering to the students' specific musical tastes. The Music GCSE course will broaden students' minds and foster a love of all music with a qualification that students of all abilities and backgrounds will enjoy.

#### **Component 1: Performing – 30% of total GCSE**

Students submit two final performances, one solo performance (15%) and one ensemble performance (15%). Performance workshops take place termly throughout the course, preparing them for their final recording. They can perform in any style or genre, on their preferred instrument/voice. Students gain more marks for more difficult pieces and we aim to reach a standard of approximately grade 4 by the end of the course. For their ensemble performance, students can perform as a duet, a band or perhaps in a larger ensemble such as Jazz band or Choir.

#### **Component 2: Composing Music – 30% of total GCSE**

Students compose two pieces in any style or genre to best reflect their skills, strengths and interests. Students learn how to compose in different styles and genres throughout the course and practise composing using different mediums, such as Sibelius music software and Logic Pro X. The advantages of using this software mean that students can compose for any type of instrument, without having to actually know how to play it. Their first composition is 'free' and can be in any style or genre; the second is based on a set of four briefs which are released at the start of the final year.

#### **Component 3: Appraising Music – 40% of total GCSE**

Students focus on four areas of study, which enable them to listen and appraise, to understand music across a variety of styles and genres. Each area of study includes two set works that are studied in detail throughout the two years. In the exam, students answer questions about the set works and one question on an unfamiliar piece of music. In section B, the students answer an essay style question, comparing a set work to a contrasting piece.

Students should be able to perform on their preferred instrument and should aim to be around grade 4 by the end of the course.

# Philosophy and Religious Studies

**Exam Board: AQA**                      **Specification Code: 8062**  
**Exam Weighting: 100% = Two x 1hour 45 minutes exams**

The course aims to:

- Develop an understanding of religious beliefs, teachings and practices.
- Critically evaluate the source of these beliefs and the impact they can have on world views and events.
- Help students to develop their own views on relevant and meaningful questions such as the meaning and purpose of life and how to live moral and ethical lives in modern times.
- Develop debating and reasoning skills, an ability to construct well informed and balanced arguments and express these clearly.

A GCSE in Philosophy and Religious Studies is useful for a variety of careers, from journalism and the media to law, medicine, social work, politics, education and the criminal justice system.

The course consists of two exams:

1. The study of religions: beliefs, teachings and practices  
This paper explores the fundamental beliefs of both Christianity and Buddhism – exploring concepts such as the Holy Trinity, the crucifixion and resurrection, Karma and the 4 Noble Truths. We then investigate how these beliefs influence religious rituals and practices. This knowledge lays the foundations to explore the issues discussed in paper 2.
2. Philosophical and ethical studies  
This paper explores prevalent and topical philosophical issues, developing understanding of religious responses whilst also helping students to reflect on and develop their own viewpoints and ideas relating to these issues. In this paper we look at:
  - Religion and Life (abortion/euthanasia)
  - The Existence of God
  - Peace and Conflict
  - Human Rights and Social Justice

Both of these units are designed to give students the opportunity to philosophically assess the issues raised within the topics. They will discuss and debate their views and critically question the views of others – from classmates to those of religions and philosophers – and draw reasoned conclusions.

Students are encouraged to challenge ‘common sense thinking’ and use a greater and wider knowledge of beliefs and practices to fully engage in some very current and important questions and discussions.

The skills developed in a GCSE in Philosophy and Religious Studies – such as critical thinking, developing arguments, problem solving and analysis – are excellent preparation for studying the IB and higher education.

### Physical Education– Examined

**Exam Board: AQA**      **Specification Code: 4892**

**Exam Weighting: 60% // Weighting for practical/performance analysis: 30% // Coursework weighting 10%**

#### Why choose GCSE PE?

The AQA GCSE Physical Education specification will inspire learning. New and contemporary topics will help students of all abilities to develop a well-rounded skill set and prepare them for progression to further studies within the IB programme.

#### How will the course be assessed?

Students will follow a linear course that is split into four areas:

- The human body and movement in physical activity and sport (Exam 30%)
- Socio-cultural influences and well-being in physical activity and sport (Exam 30%)
- Coursework analysing your strengths and areas for improvement within a sport (Coursework 10%)
- Practical performance in physical activity and sport (Practical 30%)

The first two areas will be assessed through two exams at the end of year 11. Each exam will be worth 30% of the total mark for the course (60% theory exam). 30% will see the students develop their skills and improve their performance practically, with each student being assessed in three sports from the AQA specification. 10% will still students develop a written report exploring strengths and weaknesses in one of their chosen sports. This percentage split between theory and practical will also be reflected in the lesson split over the two years of the course.

#### Practical Assessment Areas Include:

<i>Team</i>	<i>Individual</i>
Football	Athletics (2 different events)
Rugby (league and union)	Golf
Cricket	Swimming
Handball	Table Tennis
Basketball	Squash
Tennis (doubles)	Rock Climbing
Badminton (doubles)	Badminton
Netball	Tennis
Volleyball	Dance
Field Hockey	Amateur boxing
Table tennis (doubles)	Gymnastics/trampolining
Rowing	Equestrian
Squash (doubles)	Snow skiing/ Snow boarding

#### Is it right for me?

GCSE PE is an exciting course which will develop not only a student’s knowledge and performance, but also offer them an opportunity to work in a challenging and independent environment. They will need to be leaders, take responsibility for themselves, be prepared to work hard in and out of school whilst challenging themselves to become excellent in all areas of the sporting environment.

We recommend that if you pick this option you already participate in at least two sports outside of school. Further Information: Please speak to a member of the PE Department or visit the AQA GCSE PE website.

## Dane Court Grammar School – Options 2020

### Science

**Exam Board: AQA**

**Specification Code: Combined Science: Trilogy 8464**

**Triple Science: Biology 8461, Chemistry 8462, Physics 8463**

**Exam Weighting: 100%**

Science is one of the compulsory core subjects in Key Stage 4; all students will follow a balanced science course. This means that all three of the traditional sciences, biology, chemistry and physics, are studied in considerable depth.

#### Combined Science Trilogy

This will lead to the award of two GCSEs at the end of year 11. The course covers all aspects of science education: evaluating evidence and the implications of science for society; explaining, theorizing and modelling in science as well as procedural and technical knowledge of science practice. It is a subset of the triple science course and will be taught in subject specific lessons.

The course content is:

**Biology** – cell biology, organisation, infection, bioenergetics, homeostasis, evolution, ecology.

**Chemistry** – atomic structure, the periodic table, bonding and structure and properties, chemical changes, rates and energy, quantitative chemistry, organic chemistry and using our resources.

**Physics** – forces, energy, waves, electricity, magnetism, particle model and atomic structure.

There is no coursework or internal assessment. The specification sets out the apparatus and techniques students should use and develop while doing practical work. These skills and knowledge are taught within the context of 21 specified practicals. Students have to undertake these practicals during the course will face questions on them in the exam at the end of the course. These questions will count for at least 15% of the overall marks for the qualification.

The Combined Science course will have a 17 point grading scale, from 9-9, 9-8 through to 2-1, 1-1.

This course will provide a sound foundation for IB Standard and Higher Biology, Chemistry and Physics, as well as IB Standard Environmental Systems.

## Dane Court Grammar School – Options 2020

### Science continued

#### Triple Science

There is an opportunity for students to follow the three separate sciences: this will lead to the award of three GCSEs, one each in biology, chemistry and physics. Like the GCSE Combined Science, these courses emphasize explaining, theorizing and modelling in science.

Clearly, students taking the triple science option will be required to cover more material than those students taking the two GCSEs in combined science. Because of these extra requirements the triple science option is recommended only to those students the science department believes can successfully meet the additional demands of the course. The basis for this recommendation will be that students have the necessary skills, aptitude and commitment to benefit from the triple science option and will relish the challenge of the course. The decision will be made after due consideration of teacher recommendations as well as performances in tests and assessments.

The content of each course is:

**GCSE Biology** – cell biology, organisation, infection and response, bioenergetics, homeostasis and response, inheritance, variation and evolution, ecology.

**GCSE Chemistry** – atomic structure and periodicity, bonding, structure and the properties of matter, chemical changes, rates and energy, quantitative chemistry, chemical analysis, organic chemistry, chemistry of the atmosphere and using our resources.

**GCSE Physics** – forces, energy, waves, electricity, magnetism, electromagnetism, particle model of matter and atomic structure, space physics.

There is no coursework or internal assessment. The specification sets out the apparatus and techniques students should use and develop while doing practical work. These skills and knowledge are taught within the context of specified practicals for each subject; 10 for biology, 8 for chemistry and 10 for physics. Students have to undertake these practicals during the course will face questions on them in the exam at the end of the course. These questions will count for at least 15% of the overall marks for each of the qualifications.

Grades are awarded from 9 to 1 for Biology, Chemistry and Physics, (9 being the highest).

This course will provide a firm foundation for IB Standard and Higher Biology, Chemistry and Physics, as well as IB Standard Environmental Systems.

**YOU MUST BRING THIS FORM WITH YOU TO YOUR OPTIONS INTERVIEW.**

**Name:** ..... **Form:** .....

### Year 9 Options

**School Copy**

All students will study a modern language (see option block 1), English language, English literature, mathematics, statistics and either combined science (trilogy) or triple science, giving seven or eight GCSEs.

Students will also choose two GCSEs from option block 2:

Option Block 1 (Choose <u>ONE</u> Subject)	Option Block 2 (Choose <u>TWO</u> Subjects and <u>ONE</u> reserve subject)
French German	Art Business Studies Computing Drama Food Preparation and Nutrition Geography History Music PE Philosophy Second Language (French or German)

### \*Choices:

Option Block 1	Language Choice	
Option Block 2	1 <sup>st</sup> Choice	
	2 <sup>nd</sup> Choice	
	Reserve Choice	

**\*One subject should be entered in each box**

Signature of parent: \_\_\_\_\_

Initials of SLT interviewer: \_\_\_\_\_
